

# Project Proposal: Analysis of New York State Schools

- ▶ It pays to improve school quality (Hanushek, 2016)
- ▶ Raw spending on education doesn't seem to matter
- ▶ Many NY state schools perform well against the odds. Why?
- ▶ **Objective:** Determine which metrics in the *NY School Quality Reports* are the best predictors of learning performance as recorded in the *NY State School Report Card* database

### School-level Performances on Grade 5 Math Assessment (New York State)

Schools achieving 80% proficiency with at least 80% of the student population economically disadvantaged
